Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 12, 15 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Ray et al. U.S. Patent No. 4,328,813.

Referring to claims 1, 12, 15 and 26 Ray discloses a device for retaining an excess portion of the lead implanted within or on the surface of the brain of patient including:

- a burr hole ring configured to be secured to a skull of the patient (abstract); and a lead retainer extending from the burr hole ring
- the lead retainer configured to store at least a section of the excess portion of the lead (fig.3).
- a sleeve having an aperture extending there through, the sleeve being configured to be secured to a wall of a burr hole wherein the aperture is in general alignment with the burr hole (fig. 1)
- a flange extending from the sleeve, the flange having means for at least partially retaining at least a section of the excess portion of the lead (fig.4)

Art Unit: 3762

- a burr hole ring having an aperture configured to receive the lead there through and an outside surface, the burr hole ring being configured to be secured to the skull wherein the aperture in the burr hole is in general alignment with the burr hole, the outside surface of the burr hole ring having means for retaining a section of the excess portion of the lead (fig. 4)

The examiner considers the portion of the lead that passes through plug 11 to be the excess portion of the lead.

Allowable Subject Matter

3. Claims 2-11, 13, 14, 16-21, 27 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 22-25, 29-45 allowed.

Conclusion

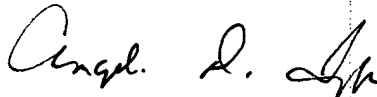

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roderick Bradford whose telephone number is (571) 272-4942. The examiner can normally be reached on Monday - Friday 9 a.m. - 6:30 p.m..
